Attachments: FULL RENTAL PROPERTY REPORT AS OF 2.28.18.pdf

Okay....so here is the report....289 incidents for 154 homes; total population is 7,021 incidents for 1,940 homes.....so about 4% of the incidents are related to rental properties. Average of approximately 65 incidents per year (289/4.5 years); the total population is about 1,560 incidents per year (7,021/4.5 years)....or about 4%....

And the rental represent 7.7% of the home population.....meaningful data point?? I think this only counters Mr. M's point that rentals have not had any issues...that is not true but it does not seem to be out of line either.....

Mike

Hi Mike,

I have attached the updated report which includes the additions from Liz and the new column of year-to-date reports. As you can see we have added 3 properties to the Public area and moved 1 property from DMMA to Public.

I have not sent this to Liz without your approval.

Have a great day!

Vicky Harjung

Administrative Coordinator, Desert Mountain
